# Personal Connection

- I have lived in Hunts Point all of my life, so I have seen the progression in the neighborhood. At times I can't seem to distinguish if the people have changed or my surroundings. The Point was open in 1994, 24 years later it is one of the most recognizable establishments in my neighborhood. I have never attended an after school program at the point, but my nephew has, I know children in the neighborhood who enjoy what they get out of The Point. The Point is something that my community depends on daily because of the youth. Our youth is the future, if we do not shape these young individuals at an early age then we have not done our job as a society.

- Sometimes what we fail to realize is that services that are provided by the point are free of charge, which in most cases things like this are not. Things are not taken for granted in this community. I have seen businesses open that were unlikely to open 10 years ago. The Point has started somewhat of a trend. The emphasis on the arts is also something that I enjoy, I think that the beauty of poor communities is the spirit that its people have.
